THE WALL-MOUNT™ STEP CAPACITY GAS/ELECTRIC - WG*S SERIES

Integrated Part Load Value (IPLV) Efficiency Up to 15.5 BTU/WATT

WG3S2, WG4S2, WG5S2 60Hz
23,000 to 56,500 BTUH Cooling Capacity
36,000 to 99,000 BTUH Heating Capacity

GREEN REFRIGERANT R-410A

- **High Efficiency**
- **Low Sound Level**

The Bard Wall-Mount Electric Air Conditioner with gas fired heating is a self contained energy efficient system which is designed to offer maximum indoor comfort at a minimal cost without using valuable indoor floor space or outside ground space. This unit is the ideal product for versatile applications such as: new construction, modular offices, school modernization, portable structures, correctional facilities, retail stores or other commercial applications. Factory or field installed accessories are available to meet specific job requirements.

MEA # (Heating): 73-03-E
MEA # (Cooling): 179-03-E

Engineered Features

Multi-Capacity Two-Stage:
Simple thermostatic control seamlessly stages the compressor and indoor airflow rate between high and low capacity operations without cycling the compressor. This helps to maximize comfort, humidity control, energy efficiency and overall reduction in compressor cycling for improved system life.

Step Capacity Compressor:
Copeland step-capacity (2-stage) scroll compressors are designed for increased efficiency, quieter operation and improved reliability for longer life.

R-410A Refrigerant:
Designed with R-410A (HFC) non-ozone depleting refrigerant in compliance with the Montreal protocol and 2010 EPA requirements.

Thermal Expansion Valves:
All models use TXV.

Liquid Line Filter Drier:
Protects system against moisture.

Aluminum Finned Copper Coils:
Grooved tubing and enhanced louvered fin for maximum heat transfer and energy efficiency.

High & Low Pressure Switches are Auto-Reset
Built-in lockout circuit resets from the room thermostat. Provides commercial quality protection to the compressor.

Compressor Control Module:
Standard on all units. Built-in off-delay timer adjustable from 30 seconds to 5 minutes. 2-minute on-delay if power interrupt. 120-second bypass for low pressure control, and both soft and manual lockouts for high and low pressure controls. Alarm output for alarm relay.

Crankcase Heaters:
Factory installed crankcase heaters are standard on all models. This helps to insure ease of start at low temperatures and improves compressor life.

Phase Rotation Monitor:
Standard on all 3 phase scroll compressors. Protects against reverse rotation if power supply is not properly connected.

Twin Blowers:
Move air quietly. All models feature variable speed blower motors providing automatic airflow adjustment for high static or free blow (non-ducted) operation at a very low sound level. Motor overload protection is standard on all models.

ECM Indoor Blower Motor:
Features a variable speed motor providing super-high efficiency, low sound levels and soft-start capabilities. The motor is self-adjusting to provide the proper airflow rate for the staged capacity, and for higher static pressure in ducted installations without user adjustment or wiring changes.

Ventilation Controller:
Automatically adjusts damper position to maintain the desired ventilation airflow rate up to 480 cfm of fresh air during any operation mode. Fully closes during unoccupied modes. Factory set for 480 cfm. Also, CO_2 sensor ready - just add CO_2 sensor for demand ventilation based on CO_2 level in the space.

Electrical Components:
Are easily accessible for routine inspection and maintenance through a right side, service panel opening. Features a lockable, hinged access cover to the circuit breaker or rotary disconnect switch.

Heat Exchanger:
Heavy duty 18-gauge stainless steel tubular heat exchanger. Mechanically joined construction. Ten-year warranty.

In-Shot Burners:
Advanced burner design, quiet operation. Low NOx models available. Low NOx models can be converted to LP gas. High altitude kits available.

Integrated DSI Control:
Direct spark ignition control and remote sensor delivers smooth, proven ignition sequence. Timed blower control and diagnostics are also features of integrated control.

Gas Controls:
Honeywell gas valve and burner orifices are factory standard for natural gas. Field convertible to LP gas with certified conversion kit.

Filter Service Door:
Separate service door provides easy access for filter change.

Pre-Painted 20 Gauge Zinc Coated Steel Cabinet:
Cleaned, rinsed, sealed and dried before the polyurethane primer is applied. The cabinet is handsomely finished with a baked on textured enamel, which allows it to withstand 1000 hours of salt spray tests per ASTM B117-03.

16 Gauge Zinc Coated Unit Base

Two-Inch, Pleated Disposable Air Filters:
Are standard equipment.

Condenser Fan and Motor Shroud Assembly:
Slides out for easy access.

Circuit Breakers/Rotary Disconnect:
Standard on all versions of single (230/208 volt) and three phase (230/208 volt) equipment. Rotary disconnects are standard on all versions of three phase (460 volt) equipment.

Slope Top:
Standard feature for water run-off.

Full Length Mounting Brackets:
Built into cabinet for improved appearance and easy installation.

Top Rain Flashing:
Standard feature on all models.

Ventilation Options:
Several patented ventilation options are available and can be factory or field installed.

- Complies with efficiency requirements of ANSI/ASHRAE/IESNA 90.1-2010.
- Certified to ANSI/ARI Standard 390-2003 for SPVU (Single Package Vertical Units).
- Intertek ETL Listed to Standard for Safety Heating and Cooling Equipment ANSI/UL 1995/CSA 22.2 No. 236-05, Fourth Edition.
- Intertek ETL Listed to Standard for Gas-Fired Central Furnaces ANSI Z21.47-2006, CSA 2.3-2006 Fifth Edition, Addenda A dated 10-01-2007, Addenda B dated 06-01-2008.
- Commercial Product - Not intended for Residential application.

Heating System Capacity, Efficiency & Airflow Ratings

Factory Standard Heating Capacity Options & Performance — See Note ① Below

Model Heating Input Code	A	B	C	D
Input BTUH	50,000	75,000	100,000	125,000
Output BTUH (Heating Capacity) ②	41,000	61,500	82,000	102,500
Thermal Efficiency (T.E.) ②	82.0	82.0	82.0	82.0
Temperature Rise Range (F)	25 - 55	30 - 60	40 - 70	50 - 80
Constant Heating CFM/Constant Rise (F)	960/35	1100/50	1365/50	1440/70

10% Field Derate Heating Capacity Options & Performance — See Note ① Below

Model Heating Input Code	A	B	C	D
Input BTUH	45,000	67,500	90,000	112,500
Output BTUH (Heating Capacity) ②	37,000	55,500	74,000	92,500
Thermal Efficiency (T.E.) ②	82.0	82.0	82.0	82.0
Temperature Rise Range (F)	25 - 55	30 - 60	40 - 70	50 - 80
Constant Heating CFM/Constant Rise (F)	960/30	1100/45	1365/45	1440/65

① Any input can be selected for each model.

② Heating ratings certified in accordance with ANSI Z21.47-2006.

Indoor Blower Performance ①

MODEL	Rated ESP	Max ESP	② Continuous CFM	③ Rated 1st Stage Cooling CFM	④ Rated 2nd Stage Cooling CFM	Heating CFM ⑤ ⑥			
						50,000 BTU Input	75,000 BTU Input	100,000 BTU Input	125,000 BTU Input
WG3S2	0.15	0.50	800	800	1100	960	1100	1365	1440
WG4S2	0.20	0.50	825	1100	1400	960	1100	1365	1440
WG5S2	0.20	0.50	850	1300	1600	960	1100	1365	1440

① Motor will deliver consistent CFM through voltage supply range with no deterioration (197-253V for 230/208V models, 414-506V for 460V models).
② Continuous CFM is the total air being circulated during continuous (manual) fan mode.
③ Will occur automatically with a call for "Y1" signal from thermostat.
④ Will occur automatically with a call for "Y2" signal from thermostat.
⑤ Will occur automatically with a call for "W" signal from thermostat.
⑥ Constant CFM of Variable Speed Motor should maintain mid-rise temperature differential through range of allowable static.

Ventilation System Packages

Bard Wall-Mounts are designed to provide optional ventilation packages to meet all of your ventilation and indoor air quality requirements. All ventilation packages can be built-in at the factory, or field-installed at a later date.

BLANK OFF PLATE - WGSBOP — STANDARD

A blank off plate is installed on the inside of the service door. It covers the air inlet openings which restricts any outside air from entering the unit. The blank off plate should be utilized in applications where outside air is not required to be mixed with the conditioned air.

COMMERCIAL ROOM VENTILATOR

COMMERCIAL ROOM VENTILATOR - WGSCRVMP-5 — OPTIONAL

The built-in commercial room ventilator is internally mounted behind the service door and allows outside ventilation air, up to 50% of the total airflow rating of the unit, to be introduced through the air inlet openings. It includes a built-in exhaust air damper with integral bug screen. Automatic control is integrated to maintain desired ventilation air at the various supply airflows while on Stage 1, Stage 2 or ventilation modes of operation.

The commercial room ventilator (CRV) is a simple and innovative approach to improving the indoor air quality by providing fresh air intake and exhaust capability through the CRV. The damper can be easily adjusted to control the amount of fresh air supplied into the building. The CRV can be controlled by indoor blower operation or field controlled based on room occupancy. The CRV is power open - spring return on power loss. Complies with ANSI/ASHRAE Standard 62.1 "Ventilation for Acceptable Indoor Air Quality".

CO_2 Sensor Ready: • WGSCRVMP-5 is designed for CO_2 based on ventilation control by simply wiring in a field installed CO_2 sensor if desired.

ECONOMIZER

ECONOMIZER - WGSEIFM-5 — OPTIONAL

The built-in economizer system is internally mounted behind the service door and allows outdoor air to be introduced through the air inlet openings. The amount of outdoor air varies in response to the system controls and settings defined by the end user. It includes a built-in exhaust air damper. The economizer is designed to provide "free cooling" when outside air conditions are cool and dry enough to satisfy cooling requirements without running the compressor. This in turn provides lower operating costs, while extending the life of the compressor.

Standard Features:

- One Piece Construction - Easy to install with no mechanical linkage adjustment required.
- Exhaust Air Damper - Built in with positive closed position. Provides exhaust air capability to prevent pressurization of tight buildings.
- Actuator Motor - 24 volt, power open, spring return with built in torque limiting switch.
- Proportioning Type Control - for maximum "free cooling" economy and comfort.
- Moisture Eliminator & Prefilter - permanent, washable aluminum construction.
- Enthalpy Control - adjustable to monitor outdoor temperature and humidity.
- Minimum Position Potentiometer - adjustable to control minimum damper blade position for ventilation purposes.
- Mixed Air Sensor - to monitor outside and return air to automatically modulate damper position.

ENERGY RECOVERY VENTILATOR

WALL-MOUNT ENERGY RECOVERY VENTILATOR - WGSERV-5 — OPTIONAL

The wall-mount energy recovery ventilator (WGSERV-5) is a highly innovative approach to address indoor air quality ventilation requirements as established by ANSI/ASHRAE Standard 62.1. The WGSERV-5 allows up to 450 CFM (depending upon speed setting) of fresh air and exhaust through the unit while maintaining superior indoor comfort and humidity levels. In most cases this can be accomplished without increasing equipment sizing or operating costs. Heat transfer efficiency is up to 74% during summer and 80% during winter conditions.

The WGSERV-5 consists of a unique "rotary energy recovery cassette" that provides effective sensible and latent heat transfer capabilities during summer and winter conditions. Various control schemes are addressed including limiting ventilation during building occupancy only.

The WGSERV-5 is designed to be internally mounted behind the service door in the WGS Gas/Electric units. It can be built-in at the factory or field installed as an option. WGSERV-5 can be independently adjusted for intake and exhaust rates.

Important Information Concerning Altitude Impact on Heating Input Ratings

Heating input, and thus heating output, decreases with altitude. No orifice change is required up to 6,000 feet elevation and derate occurs naturally due to altitude impact. **Natural gas models may require orifice change based on BTU content of gas. See Natural Gas Orifice and Altitude Tables on next page for details**. For Propane Gas see the Propane Gas Conversion Table below.

Above 6,000 feet elevation orifice changes are required, and capacity reductions are a function of altitude impact and orifice change. Pressure switch change is required above 6,000 feet elevation. For Natural Gas see the Orifice and Altitude Tables on next page. For Propane Gas see the Propane Gas Conversion Table below.

NATURAL GAS DERATE CAPACITIES

WG Rated Input	Sea Level	1000	2000	3000	4000	5000	6000	7000	8000	9000	10,000

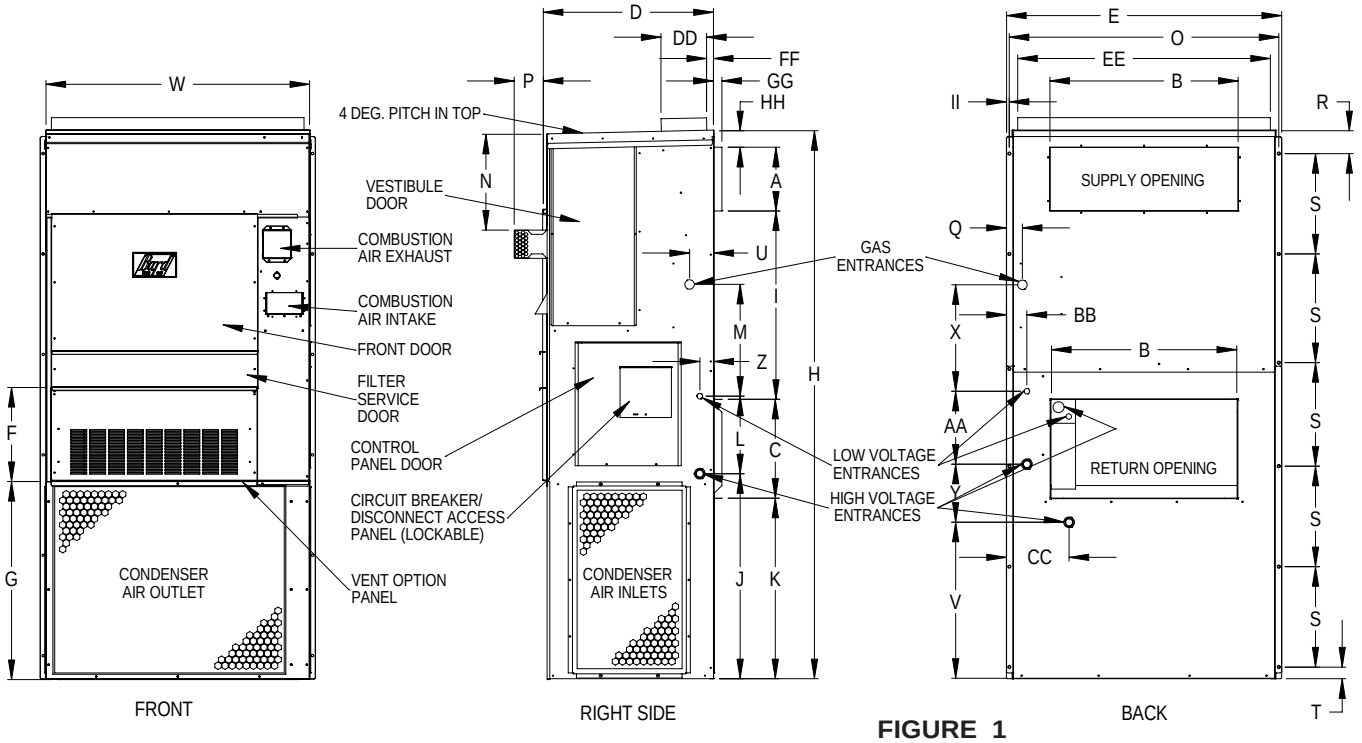

FIGURE 1
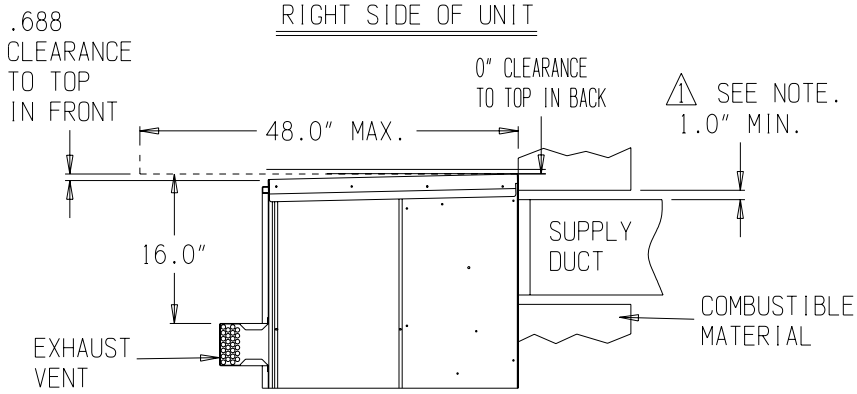
COMBUSTIBLE CLEARANCE

MIS-3240

Minimum Clearances	
Outlet Duct (from combustible materials)	1" first 3'
Vent Terminal (from combustible materials)	17"
Condenser Outlet	20"
Top	See Figure 1
Burner Service	20"
Combustible Base (Wood or Class A, B or C roof covering material)	0"



1 SIDE SECTION VIEW OF SUPPLY AIR DUCT FOR WALL MOUNTED UNIT SHOWING 1.0" CLEARANCE TO ALL COMBUSTIBLE SURFACES.

MIS-1714

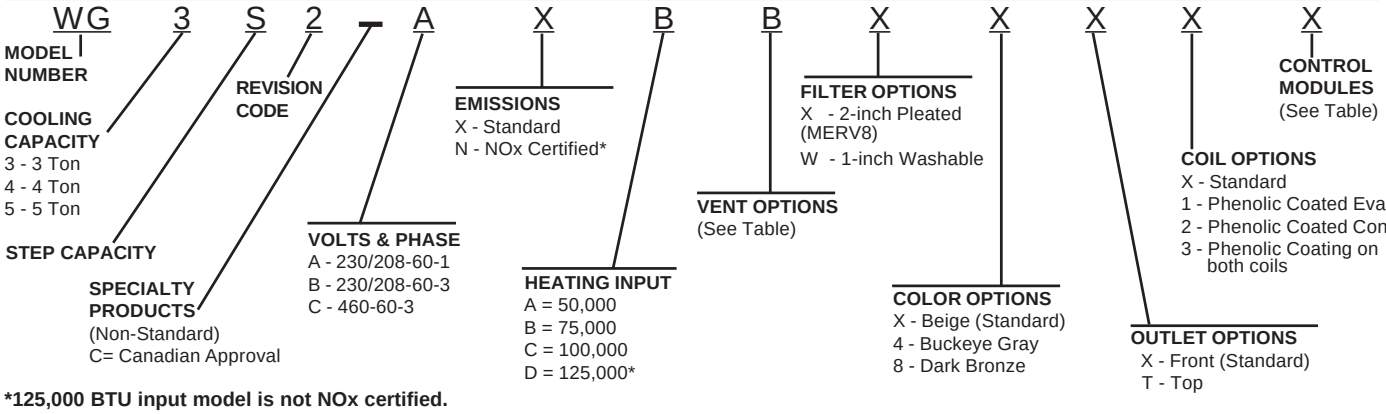
⚠ WARNING

A ***minimum*** of one (1) inch clearance must be maintained between the supply air duct and combustible materials. This is required for the first three (3) feet of ducting.

It is important to insure that the one (1) inch minimum spacing is maintained at all points.

Failure to do this could result in overheating the combustible material and may result in a fire causing damage, injury or death.

Air Conditioning Wall-Mount Model Nomenclature



***125,000 BTU input model is not NOx certified.**

Ventilation Options

Models	WG3S, WG4S, WG5S	
Description	**Factory Installed Code No.**	**Field Installed Part No.**
Blank-Off Plate (Standard)	B	WGSBOP-5
Commercial Ventilator - Modulating Spring Return w/Exhaust	V	WGSCRVMP-5
Economizer (Internal) Fully Modulating w/Exhaust ①	E	WGSEIFM-5
Energy Recovery Ventilator - 230 Volt w/Exhaust ②	R	WGSERV-A5A-✳
Energy Recovery Ventilator - 460 Volt w/Exhaust ②	R	WGSERV-C5A-✳

① Low ambient control is required with economizer for low temperature compressor operation.
② Independent selection of intake and exhaust speeds (rate) with terminal block selection.
✳ Color option must be specified to match unit ("X" = Beige; "4" = Buckeye Gray; "8" = Dark Bronze)

Top Supply Outlet Conversion Kits - Field Installed

USED WITH MODELS	UNIT COLOR X - BEIGE	UNIT COLOR 4 - BUCKEYE GRAY	UNIT COLOR 8 - DARK BRONZE
WG3S, WG4S, WG5S	TSO-WG5-X	TSO-WG5-4	TSO-WG5-8

Air Conditioning Control Modules *(All Models Except as Noted)*

HPC ①	LPC ②	CCM ③	LAC ④	SK ⑤	Factory Installed Code	Field Installed Part
STD	STD	STD			X	N/A
STD	STD	STD	●		H	CMA-28
STD	STD	STD		●	***Field Installed Only***	SK114 for WG3S1-A
STD	STD	STD		●	***Field Installed Only***	SK111 for WG4S1-A
STD	STD	STD		●	***Field Installed Only***	SK115 for WG5S1-A

STD = Standard equipment for these specified models.
① HPC. High pressure control is auto reset. Always used with compressor control module (CCM) which is included. See note ③.
② LPC. Low pressure control is auto reset. Always used with compressor control module (CCM) which is included. See note ③.
③ CCM. Compressor control module has adjustable 30-second to 5-minute delay-on-break timer. On initial power-up, or any time the power is interrupted, the delay-on-make will be 2-minutes plus 10% of the delay-on-break setting. There is no delay-on-make during routine operation of the unit. The module also provides the lockout feature (with 1 retry) for high and/or low-pressure controls, and a 2-minute timed bypass for low-pressure control.
④ LAC. Low ambient control permits cooling operation down to 0°F.
⑤ SK. Start capacitor and potential relay start kit can be used with all -A single phase models. Increases starting torque 9x. Not used for -B or -C three phase models.

Optional Field Installed Accessories

DESCRIPTION	PART NUMBER
Natural Gas High Altitude Pressure Switch Kit (6000 - 10,000 Feet)	8620-189
Note: Natural Gas Orifice Change May Be Required Depending Upon Altitude and Gas BTU content. See Orifice and Altitude Tables.	
Propane Gas Conversion Kit (0 - 6000 Feet Altitude)	WGCK-1
Propane Gas Conversion Kit (6000 - 10,000 Feet Altitude)	WGCK-2
Vertical Vent Kit (Includes all parts for 5 foot vertical vent)	VVK-5A
Additional 1 foot vertical vent pipe section for VVK-5A	8620-201
Additional 2 foot vertical vent pipe section for VVK-5A	8620-170
Additional 3 foot vertical vent pipe section for VVK-5A	8620-200
Additional 5 foot vertical vent pipe section for VVK-5A	8620-171
